

Exceeding Expectations...Every Day.

Laser Resources utilizes e-Info as an online portal enabling all of their customers to enter data and request service quickly and easily. Customers receive a company ID number and password so they can enter meter reads, service calls, and supply orders right on the LRI website without ever having to pick up a phone. These entries and requests go directly into LRI's e-Automate system and alerts the dispatch team to send out a technician. e-Info even sends an immediate email to the LRI dispatch center so the customer doesn't have to. When LRI fulfills a supply order, the customer will receive an email confirmation automatically.

Customers can enter a service call and e-Info will alert LRI immediately through e-Automate and with an additional email to the dispatch team.

Customers can see all of their machines and which ones are due to submit meter reads. Then, they can use e-Info to submit them to LRI.

Customers can order supplies, including toner, staples, and more, and have them shipped directly to their door with the touch of a button.
